ABOUT US

Our Journey

Jomson Interiors Works has come a long way since our humble beginnings in 2000. With a passion for delivering exceptional quality and service, we have established ourselves as a leading name in the interior design industry.

Early Years (2000-2007)

Our journey began with working on various projects in Chennai, Coimbatore, Madurai, Salem, and Hosur, specializing in PVC doors and cupboards using local materials. This experience laid the foundation for our future success.

Small Shop to Big Dreams (2007-2012)

In 2007, we took a significant step forward by opening a small shop in Kannankurichi, Salem. This marked the beginning of our growth and expansion.

Company Registration and New Beginnings (2012)

We officially registered our company, Balabharathi Interior & Wood Carving Works, in 2012. This milestone enabled us to introduce new products and services, including Jomson PVC interior materials imported from Malaysia.

A Decade of Excellence (2012-2019)

With Jomson materials, we successfully completed over 6000 projects, solidifying our reputation for quality and reliability. Our commitment to excellence earned us a loyal customer base.

Our Strengths

- > Best quality products
- > Unmatched service
- > Affordable prices
- > Wide network of dealers across Tamil Nadu, Karnataka, and Kerala

UPVC Interior Works (2019)

In 2019, we expanded our offerings to include UPVC interior works, such as kitchen cabinets, TV units, wardrobes, dressing tables, and more. This move further enhanced our position in the market.

SPC Interior Panels (2023)

We are proud to introduce SPC interior panels imported from Vietnam, adding another dimension to our product range.

OUR MISSION

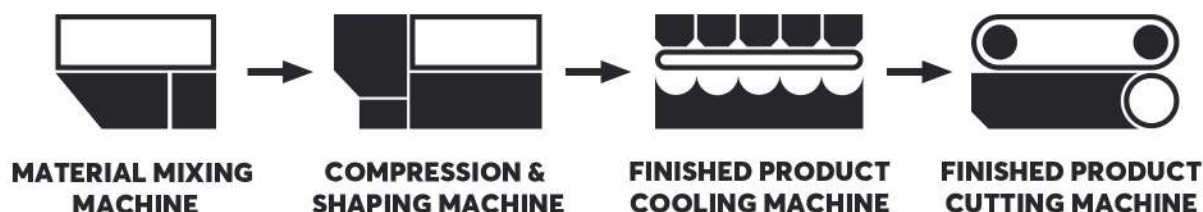

"At Jomson Interiors, we believe that a home is a reflection of one's desires. Leveraging cutting-edge technology, our mission is to deliver long-term reliability and profitability to our valued customers. We are committed to providing high-quality work within your specified timeframe and budget, exceeding your expectations. Our SPC products are ideal for crafting kitchen cabinets that mimic the look of wood but offer 100% water resistance. Our extensive range of colors and finishes, including metallic and real wood finishes, cater to diverse tastes. With the world's first three-roller printing technology, we offer superior quality products that are termite-proof, easy to install, and require no additional finishing. Our products can be customized to meet specific customer requirements, ensuring a perfect fit for your unique needs."

OUR PROMISE

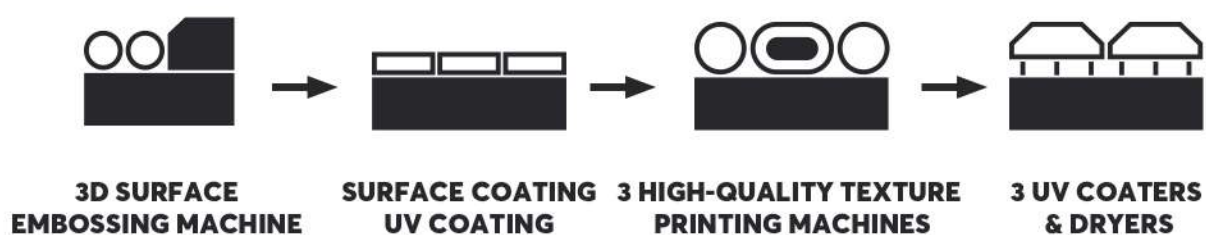

For over 17 years, since our inception in 2007, Jomsons UPVC Interiors has remained steadfast in its commitment to excellence, consistently delivering unparalleled quality and service. As we navigate the ever-changing landscape of our industry, we continue to pioneer innovative solutions and strategically expand our product portfolio to address the dynamic needs of our discerning clientele, ensuring a future-proof partnership built on trust, reliability, and precision.

PRODUCTION TECHNOLOGY

The equipment is imported from Taiwan, utilized by European technology, and operated by experienced specialists, consultants, and senior engineers. We have a large number of highly skilled workers to meet the demand for continuous 24/7 production. Finished product output is estimated at 80.000 tons/year

EXTRUSION SYSTEM

TEXTURE PRINTING SYSTEM

JOMSON SPC INTERIOR PANELS

Produced using an advanced and synchronized machinery system with the main components, stone powder, and formaldehyde-free additives. JOMSON SPC interior panels have emerged as an innovative, long-lasting, and environmentally-friendly product line

Glossy coating layer

Protects against UV, enhances adhesion, prevents scratches, and repels dust

UV coating layer

Consists of 3 UV layers: base layer, middle layer, and surface layer. Increases scratch resistance, enhances the clarity of patterns, and keeps the panel looking new.

Wood grain color layer

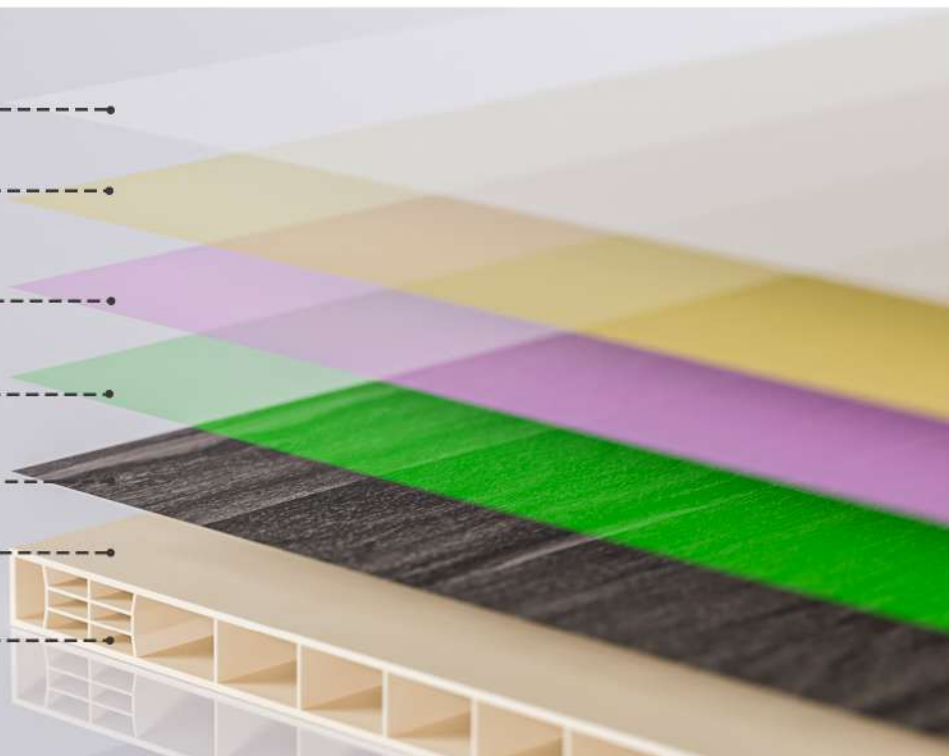

Modern design based on the most popular interior trends.

Premium resin core layer

Advanced extrusion technology creates the hollow structure of JOMSON SPC interior panel, reduces warping and facilitates easy installation.

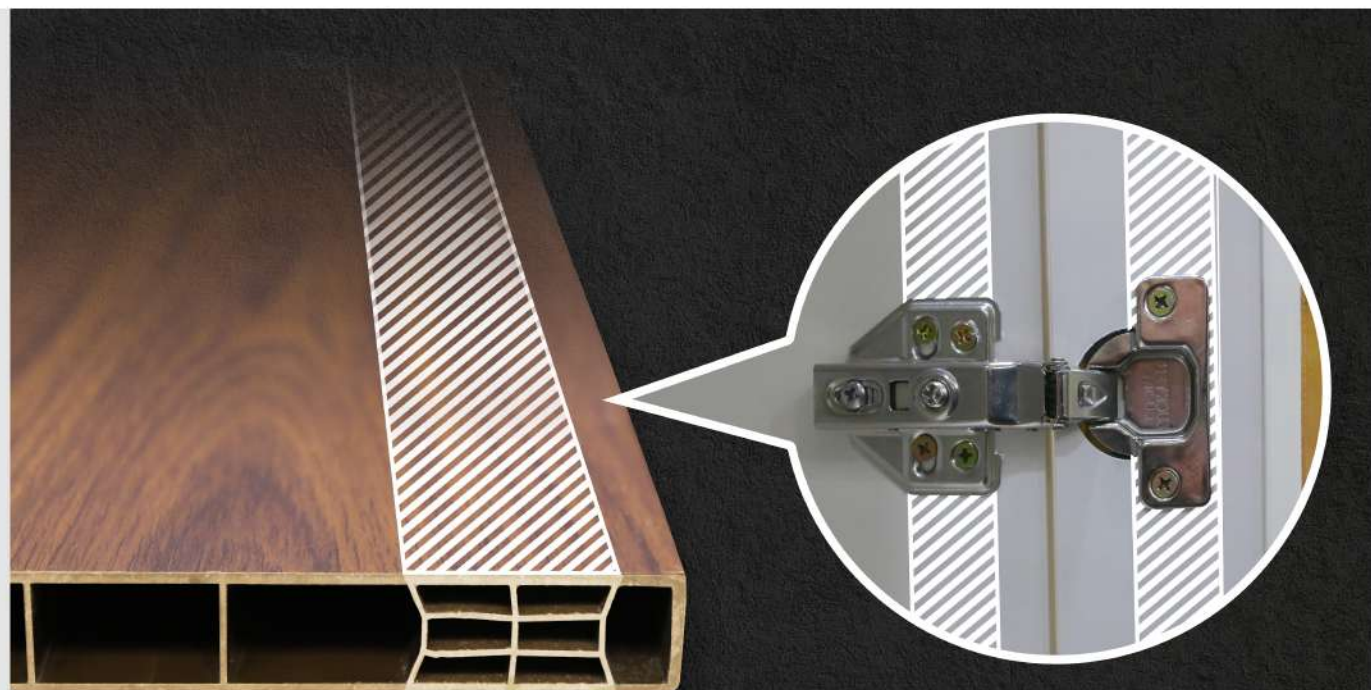

Reinforcement frame

This reinforced frame system is highly durable to help prevent warping during installation and use, ensuring long-lasting performance.

REINFORCEMENT FRAME SYSTEM

The reinforcement frame system is thoroughly researched and tested. It enhances the panels' longevity and its compatibility with other accessories, thereby preventing sagging, loose screws, and other issues.

STRENGTHS

JOMSON SPC INTERIOR PANELS

EXCEPTIONAL DURABILITY

The panels' long-term durability is aided by the sturdy and precisely designed 3-layer reinforcing frame system.

EASY CONSTRUCTION

Interior workshops' construction time is reduced by the use of complete panel accessories and a variety of panel sizes.

FIRE SPREAD PREVENTION

Not only does the stone powder enhance the durability of the panels, but it also offers exceptional fire spread prevention.

EASY HYGIENE

The surface is coated with numerous layers of UV and is anti-fouling, making it effortless to clean during use.

USER-FRIENDLY

Completely devoid of Formaldehyde and generate minimal fine dust during construction.

LOW MAINTENANCE COST

The panels have a durability after testing of up to 15 years, minimizing warranty and interior maintenance costs.

GREEN MATERIALS

With the main components being PVC powder and stone powder, the panels are reusable with many life cycles.

ABSOLUTELY WATERPROOF

ECOPLAST interior panels are 100% waterproof thanks to the PVC powder.

DIVERSE COLORS

The diverse color maps provide various choices for different interior styles.

ANTI-TERMITE

The panels are resistant to termites thanks to the absence of wood powder.

ECO-FRIENDLY MATERIAL

ACCESSORIES

EXCLUSIVE FOR JOMSON SPC

An accessory line that is printed in accordance with the color code of the panels, resulting in a homogeneous appearance of interior products, a reduction in investment costs for machinery, and an increase in construction speed.

PRINT-SYNCHRONOUS E-SHAPED EDGE BANDINGS

Improve the aesthetics of the panels

Are printed and coated with PVC film
to match the panel color

Are used in joining panels to create suitable
thickness for certain interior products

2.0 PRINTED EDGE BANDINGS

Have strong bending ability

Have small legs that are compatible
with the structure of the panels

Are synchronously printed and coated with PVC film,
resulting in a complete and flawless product surface

Printed U-shaped Edge Bandings

The edge bandings are synchronously printed
with the panels

The legs are designed to be 100% compatible with
the hollow structure of JOMSON SPC interior panels

The edge bandings have the same sizes as the panels

The edge bandings do not peel

Convenient when producing installation products
or interior products in large quantities
